Profile Summary

Senior UI/UX Designer with 6 years of experience designing enterprise ERP, SaaS platforms, healthcare systems, and web applications. Specializes in complex business workflows, information architecture, interaction design, and scalable design systems. Combines product design with Angular UI development and AI-assisted workflows to improve delivery efficiency, usability, and design consistency. Experienced in cross-functional collaboration, usability audits, and translating business requirements into practical, production-ready interfaces.

Key Achievements

- Delivery Efficiency: Reduced the overall screen delivery workflow from approximately 16 hours to 7–9 hours through AI-assisted design, UI development, refinement, and UAT.
- Enterprise Scale: Designed and improved workflows across 75+ ERP modules serving 200+ clients and 2,500+ users.
- Design Systems: Standardized 40+ reusable UI components, contributing to a reported 40% reduction in UI inconsistencies.
- Usability Improvements: Contributed to a 25% reduction in form errors through clearer input patterns and validation.
- Design-to-Development: Improved design reviews and developer handoffs, contributing to approximately 30% faster delivery.

Core Skills

- Product & UX Design: Product Design, UI/UX Design, Interaction Design, Information Architecture, User Flows, Wireframing, Prototyping, Usability Audits, Workflow Optimization, Responsive Design
- Enterprise Products: ERP, Enterprise SaaS, Finance, HRMS, Dashboards, Reporting, Manufacturing, Workforce Management, Industrial Workflows
- Design Systems: Reusable Components, Design Tokens, JSON-Based Tokens, Component States, Design Governance, White-Label Themes, Light and Dark Themes
- Collaboration: Requirements Analysis, Stakeholder Collaboration, Developer Handoff, Design Reviews, QA/UAT, Mentoring
- Tools & Technology: Figma, FigJam, Photoshop, ChatGPT, Claude, Google AI Studio, Cursor, Figma Make, Angular UI Development, HTML, CSS, GitHub, WordPress

Professional Experience

Senior UI/UX Designer | GoodBooks Technologies Pvt Ltd, Coimbatore.

December 2022 – Present | Enterprise ERP & SaaS

- Own UX design across 75+ ERP modules covering Finance, HRMS, master data, dashboards, reporting, and operational workflows.
- Design and optimize complex business workflows, balancing usability, data accuracy, business requirements, and engineering constraints.
- Serve as the primary designer for IT Declaration and Timesheet improvements, simplifying employee workflows and improving task accessibility.
- Contributed to reducing overall screen delivery time from approximately 16 hours to 7–9 hours through AI-assisted first iterations, design, UI development, refinement, and UAT.

- Develop reusable UI components and design-system patterns for forms, buttons, tables, reports, and customer-specific themes.
- Support design-token adoption and design-system governance to improve consistency and reduce one-off styling across the team.
- Conduct usability audits of developed screens, identifying friction points and improving interaction patterns, validation, and information hierarchy.
- Design responsive interfaces for web, mobile, PDA, and kiosk environments, including industrial and manpower-intensive workflows.
- Collaborate with product stakeholders, developers, and QA teams to align designs with business logic, implementation requirements, and edge cases.
- Use AI-assisted design and UI-development tools to accelerate screen creation and iteration while maintaining design quality.
- Mentor junior designers and contribute to design reviews and cross-functional delivery.

UI/UX Designer | WebIndia Internet Services Pvt Ltd, Chennai.
May 2022 – December 2022 | Websites & Web Applications

- Translated client requirements into responsive websites, landing pages, dashboards, and web application interfaces.
- Improved information architecture, page layouts, and navigation to support usability, engagement, and conversion goals.
- Delivered mobile-first WordPress websites using modular layouts and reusable content structures.
- Collaborated with clients and implementation teams to align visual design, functionality, and business requirements.

Graphic Web Designer | Silitrox, Theni.
September 2020 – May 2022 | Healthcare Management Systems

- Designed healthcare management system interfaces for Admission, Pharmacy, Laboratory, Surgery, and Billing workflows.
- Created wireframes, UI screens, motion graphics, and training visuals for healthcare software and staff onboarding.
- Simplified form layouts, information grouping, and input patterns to make healthcare workflows easier to understand and operate.

Education

Bachelor of Science (B.Sc.) in Information Technology

Theni Kammavar Sangam College of Arts & Science | 2017–2020
